

Unito Descriptions

Long

Founded in 2015, Unito was created to integrate disparate SaaS applications, enabling workflows that cross the boundaries of tools, teams, and organizations. Unito's workflow management platform and two-way integrations allow information to flow freely between apps like Trello, Asana, Jira, and Wrike, leading to easier collaboration, more efficient work, and higher productivity.

Short

Unito empowers workflows across tools, teams, and organizations. Its two-way integrations with apps like Trello, Asana, and Jira allow you to better collaborate and be more productive.

One line

Build the workflow you need with the tools you already have.
